

# CROP-SHARING

Centre for Responsible Organisations & Practices

## In this issue:

- Seminar series
- Research Retreats
- VERTIGO training
- Activity Points

## Research Retreats

The first retreat for the year at Austinmer Surf Club has been a resounding success with over 20 researchers attending one or two days. Three more retreats are planned at the original venue of Mt Kiera Scout Camp. Dates for the diary are the 18th/19th June; 21st/22nd August; & 5th/6th/7th November.

These events are fully catered and provide a quiet period of time to concentrate on writing and getting to know staff and students from other disciplines.

## Seminar Series 2019

Following on from an informative and interesting seminar series in 2018, the seminars in 2019 will be held from 11.30—1.00 on the second Tuesday of the month. Rod Clarke will kick off with his presentation: on 9th April:

### **Interviewing as Communication: A New Approach for Planning and Conducting Static and Go-along Interviews.**

At the moment we have several spaces available for presentations so contact Lee Moerman (leem@uow.edu.au if you are interested in contributing.

Further information regarding seminars will be circulated shortly.

## Vertigo Training

Vertigo is the impact tracker software recently adopted by UOW.

(<http://www.vertigoventures.com/>).

With the current research focus on impact and engagement, this workshop will present timely information for CROP members to begin collecting impact evidence.

## Engagement Ladder— Activity Points

You may recall CROP is based on a series of ladders. This year we will be implementing activity points to measure member engagement.

Research Retreat –Austinmeer Surrf Club February 2019
