

Western Australia

Patient Outcomes in Palliative Care

July – December 2015

March 2016

PCOC is a national palliative care project funded by the
Australian Government Department of Health

www.pcoc.org.au

About the Palliative Care Outcomes Collaboration

The Palliative Care Outcomes Collaboration (PCOC) is a national program that utilises standardised clinical assessment tools to measure and benchmark patient outcomes in palliative care. Participation in PCOC is voluntary and can assist palliative care service providers to improve practice. This is achieved via the PCOC patient outcome improvement framework which is designed to:

- provide clinicians with the tools to systematically assess individual patient experiences using validated clinical assessment tools,
- define a common clinical language to streamline communication between palliative care providers,
- facilitate the routine collection of national palliative care data to drive quality improvement through reporting and benchmarking,
- provide service-to-service benchmarking reports and opportunities to discuss sector results at benchmarking workshops, and
- support research using the PCOC longitudinal database (2006-2015).

The PCOC dataset includes the clinical assessment tools: Palliative Care Phase, Palliative Care Problem Severity Score (PCPSS), Symptom Assessment Scale (SAS), Australia-modified Karnofsky Performance Status (AKPS) scale and Resource Utilisation Groups – Activities of Daily Living (RUG-ADL).

PCOC has divided Australia into four zones for the purpose of engaging with palliative care service providers. Each zone is represented by a chief investigator from one of the collaborative centres. The four PCOC zones and their respective chief investigators are:

| | | |
|--------------|---|---|
| Central Zone |  | Professor Kathy Eagar , Australian Health Services Research Institute, University of Wollongong |
| North Zone |  | Professor Patsy Yates , Institute of Health and Biomedical Innovation, Queensland University of Technology |
| South Zone |  | Professor David Currow , Department of Palliative and Supportive Services, Flinders University |
| West Zone |  | Dr Claire Johnson , Cancer and Palliative Care Research and Evaluation Unit, University of WA |

Each zone is also represented by one or more quality improvement facilitators, whose role includes supporting services to participate in PCOC and facilitating ongoing service development and quality improvement. The national team, located within the Australian Health Services Research Institute at the University of Wollongong, coordinates the patient outcomes reporting, education program, and quality activities across the four zones.

If you would like more information or have any queries about this report please contact your local quality improvement facilitator or contact the national office at pcoc@uow.edu.au or phone (02) 4221 4411.

Introduction

The Palliative Care Outcomes Collaboration (PCOC) assists services to improve the quality of the palliative care they provide through the analysis and benchmarking of patient outcomes. In this patient outcome report, data submitted for the July to December 2015 period are summarised and patient outcomes benchmarked. The purpose of benchmarking is to drive palliative care service innovation and provide participating services with the opportunity to compare their service nationally.

Patient outcomes are reported for a total of 19,829 patients, with 25,331 episodes of care and 58,547 palliative care phases. The information included in this report is determined by a data scoping method. See Appendix A for more information on the data included in this report.

Throughout this report, patient information for Western Australian services is presented alongside the national figures for comparative purposes. The national figures are based on information submitted by 102 services, of which:

- 59 are inpatient services. Inpatient services include patients who have been seen in designated palliative care beds as well as non-designated bed consultations.
- 31 are community services. These services include primarily patients seen in the community as well as some patients with ambulatory/clinic episodes.
- 12 are services with both inpatient and community settings.

The Western Australian figures in this report are based on information submitted by 10 Services. A list of these Services is presented in Table 1 on the following page. A full list of the Services included in the national figures can be found at www.pcoc.org.au.

Interpretation hint:

Some tables throughout this report may be incomplete. This is because some items may not be applicable or it may be due to data quality issues.

Please use the following key when interpreting the tables:

- | | |
|-----------|---|
| na | The item is not applicable. |
| u | The item was unavailable. |
| s | The item was suppressed due to insufficient data as there was less than 10 observations. |

Table 1 List of Western Australian Services included in this report

| Service name | Setting of care |
|--|-------------------------|
| Bethesda Hospital | Inpatient |
| Metropolitan Palliative Care Consultancy Service | Community |
| Northam Palliative Care | Inpatient and community |
| Ramsay Health Care Peel Health Campus | Inpatient |
| Royal Perth Hospital | Inpatient |
| Royal Perth Hospital - Nurse Practitioner | Inpatient |
| Silver Chain Hospice Care Service | Community |
| St John of God - Murdoch Community Hospice | Inpatient |
| St John of God Bunbury Hospital | Inpatient |
| St John of God Geraldton Hospital | Inpatient |

Section 1 Benchmark summary

1.1 Western Australian Services at a glance

Table 2 Summary of outcome measures by setting

| Outcome measure | Description | Benchmark | Inpatient | | Community | |
|--|---|-----------|-----------|----------------|-----------|----------------|
| | | | WA Score | Benchmark Met? | WA Score | Benchmark Met? |
| 1. Time from date ready for care to episode start | Benchmark 1: Patients episode commences on the day of, or the day after date ready for care | 90% | 97.0 | Yes | 99.8 | Yes |
| 2. Time in unstable phase | Benchmark 2: Patients in the unstable phase for 3 days or less | 90% | 96.4 | Yes | 93.2 | Yes |
| 3. Change in pain | Benchmark 3.1: PCPSS Patients with absent or mild pain at phase start, remaining absent or mild at phase end | 90% | 93.0 | Yes | 87.3 | No |
| | Benchmark 3.2: PCPSS Patients with moderate or severe pain at phase start, with absent or mild pain at phase end | 60% | 58.4 | No | 72.7 | Yes |
| | Benchmark 3.3: SAS Patients with absent or mild distress from pain at phase start, remaining absent or mild at phase end | 90% | 90.4 | Yes | 84.2 | No |
| | Benchmark 3.4: SAS Patients with moderate or severe distress from pain at phase start, with absent or mild at phase end | 60% | 60.2 | Yes | 65.2 | Yes |
| 4. Average improvement on the 2014 baseline national average (X-CAS) | Benchmark 4.1: Pain (PCPSS) | 0.0 | 0.16 | Yes | 0.01 | Yes |
| | Benchmark 4.2: Other symptoms (PCPSS) | 0.0 | 0.27 | Yes | 0.02 | Yes |
| | Benchmark 4.3: Family / carer (PCPSS) | 0.0 | 0.18 | Yes | 0.10 | Yes |
| | Benchmark 4.4: Psychological / spiritual (PCPSS) | 0.0 | 0.18 | Yes | 0.01 | Yes |
| | Benchmark 4.5: Pain (SAS) | 0.0 | 0.46 | Yes | 0.06 | Yes |
| | Benchmark 4.6: Nausea (SAS) | 0.0 | 0.27 | Yes | 0.06 | Yes |
| | Benchmark 4.7: Breathing problems (SAS) | 0.0 | 0.49 | Yes | 0.06 | Yes |
| | Benchmark 4.8: Bowel problems (SAS) | 0.0 | 0.32 | Yes | 0.19 | Yes |

1.2 National benchmark profiles

In this section, the national profiles for selected benchmarks are split by setting (inpatient or community) and presented graphically.

The selected benchmarks included are:

- Benchmark 1 Patients episode commences on the day of or the day after date ready for care
- Benchmark 2 Patients in the unstable phase for 3 days or less
- Benchmark 3.1 PCPSS: Patients with absent or mild pain at phase start, remaining absent or mild at phase end
- Benchmark 3.2 PCPSS: Patients with moderate or severe pain at phase start, with absent or mild pain at phase end
- Benchmark 3.3 SAS: Patients with absent or mild distress from pain at phase start, remaining absent or mild at phase end
- Benchmark 3.4 SAS: Patients with moderate or severe distress from pain at phase start, with absent or mild distress from pain at phase end

Interpretation hint:

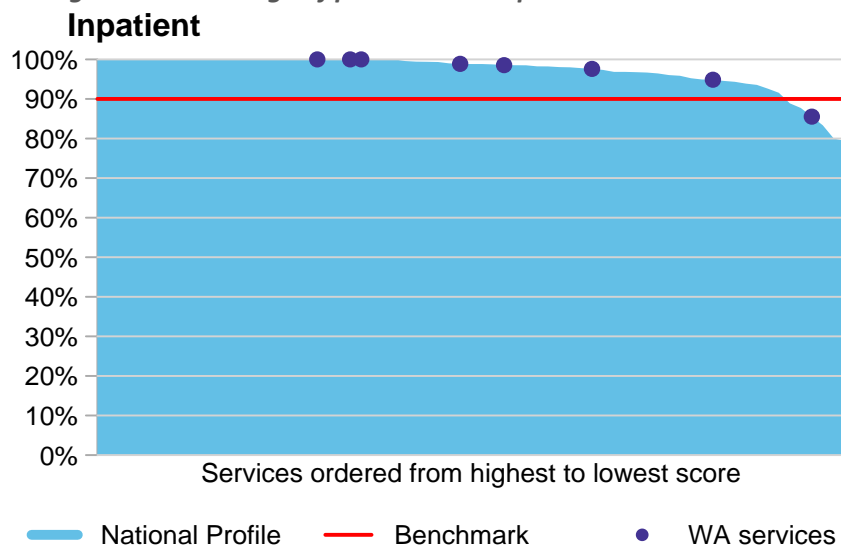

The national profile graphs on the following pages present Western Australian services in comparison to other palliative care services participating in PCOC. In each graph, the shaded region describes the national profile for that outcome measure. Western Australian services are highlighted as dots on the graph.

If a dot is missing on a particular graph, this means that a service has not met the criteria for inclusion in this measure. This may be caused by insufficient data item completion, or a service having less than ten observations falling into a particular category, for example, fewer than 10 phases starting with moderate or severe SAS pain.

The red line on the graph indicates the benchmark for that outcome measure.

Outcome measure 1 – Time from date ready for care to episode start

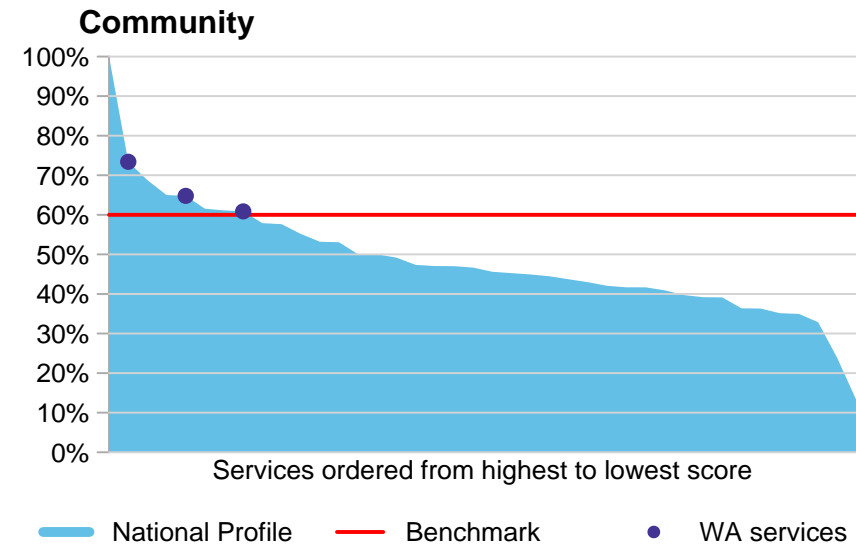

Figure 5 SAS: Percentage of patients with absent or mild distress from pain at phase start, remaining absent or mild at phase end

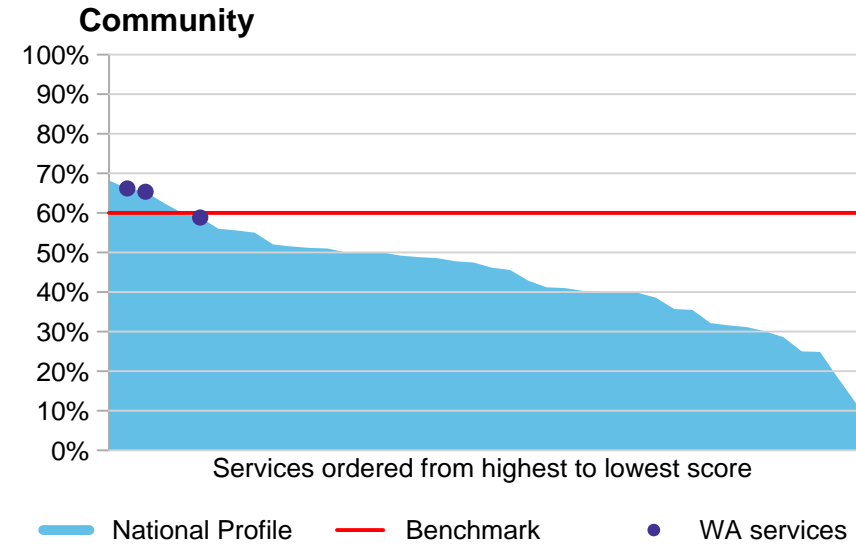

Figure 6 SAS: Percentage of patients with moderate or severe distress from pain at phase start, with absent or mild distress from pain at phase end

Section 2 Outcome measures in detail

2.1 Outcome measure 1 – Time from date ready for care to episode start

Time from date ready for care to episode start reports responsiveness of palliative care services to patient needs. This benchmark was set following feedback and subsequent consultation with PCOC participants. Service providers acknowledge that, whilst there is wide variation in the delivery of palliative care across the country, access to palliative care should be measured based on patient need rather than service availability. As a result, services operating five days a week (Monday to Friday) are not distinguished from services operating seven days a week (all services are being benchmarked together).

Benchmark 1: This measure relates to the time taken for an episode to commence following the date the patient is available and ready to receive palliative care. To meet the benchmark for this measure, at least 90% of patients must have their episode commence on the day of, or the day following date ready for care.

Table 3 Time from date ready for care to episode start by setting

| Time (in days) | Inpatient | | | | Community | | | |
|----------------------|-------------|------|--------------|------|-------------|------|--------------|------|
| | WA Services | | All Services | | WA Services | | All Services | |
| | N | % | N | % | N | % | N | % |
| Same day | 1,081 | 86.8 | 11,313 | 92.8 | 2,451 | 99.7 | 8,656 | 81.7 |
| Following day | 127 | 10.2 | 584 | 4.8 | 1 | 0.0 | 519 | 4.9 |
| 2-7 days | 38 | 3.0 | 258 | 2.1 | 1 | 0.0 | 1,064 | 10.0 |
| 8-14 days | 0 | 0 | 24 | 0.2 | 1 | 0.0 | 223 | 2.1 |
| Greater than 14 days | 0 | 0 | 9 | 0.1 | 4 | 0.2 | 135 | 1.3 |
| Average | 1.1 | na | 1.1 | na | 1.1 | na | 1.9 | na |
| Median | 1 | na | 1 | na | 1 | na | 1 | na |

Note: Only episodes that started in this reporting period have been included in the table. Episodes where date ready for care was not recorded are excluded from the table. In addition, all records where time from date ready for care to episode start was greater than 90 days were considered to be atypical and were assumed to equal 90 days for the purpose of calculating the average and median time.

Interpretation hint:

Outcome measure 1 only includes episodes that have commenced in the reporting period. As a result, the number of episodes included in the calculation of this benchmark may not match the number of episodes in Appendix A. For more information on data scoping methods, see Appendix C.

Figure 7 Trends in benchmark 1: Patients with episodes that commenced on the day of, or the day after date ready for care by setting

2.2 Outcome measure 2 – Time in unstable phase

The unstable phase type, by nature of its definition, alerts clinical staff to the need for urgent changes to the patient’s plan of care or that emergency intervention is required. Those patients assessed to be in the unstable phase require intense review for a short period of time.

An unstable phase is triggered if:

- a patient experiences a new, unanticipated problem, and / or
- a patient experiences a rapid increase in the severity of an existing problem, and / or
- a patient’s family / carers experience a sudden change in circumstances that adversely impacts the patient’s care.

The patient moves out of the unstable phase in one of two ways:

- A new plan of care has been put in place, has been reviewed and does not require any additional changes. This does not necessarily mean that the symptom / crisis has been fully resolved. However, the clinical team will have a clear diagnosis and a plan for the patient’s care. In this situation, the patient will move to either the stable or deteriorating phase.
- The patient is likely to die within a matter of days. In this situation, the patient will be moved into the terminal phase.

Benchmark 2: This benchmark relates to the time that a patient spends in the unstable phase. To meet this benchmark, at least 90% of unstable phases must last for 3 days or less.

Table 4 Time in unstable phase by setting

| Time in unstable phase | Inpatient | | | | Community | | | |
|------------------------|-------------|--------------|--------------|--------------|-------------|--------------|--------------|--------------|
| | WA Services | | All Services | | WA Services | | All Services | |
| | N | % | N | % | N | % | N | % |
| Same day | 34 | 8.2 | 279 | 4.0 | 251 | 40.7 | 899 | 23.9 |
| 1 day | 271 | 65.6 | 3,292 | 47.5 | 252 | 40.9 | 1,255 | 33.3 |
| 2 days | 64 | 15.5 | 1,647 | 23.8 | 41 | 6.7 | 444 | 11.8 |
| 3 days | 29 | 7.0 | 750 | 10.8 | 30 | 4.9 | 261 | 6.9 |
| 4-5 days | 13 | 3.1 | 572 | 8.3 | 9 | 1.5 | 237 | 6.3 |
| 6-7 days | 1 | 0.2 | 192 | 2.8 | 15 | 2.4 | 211 | 5.6 |
| 8-14 days | 1 | 0.2 | 148 | 2.1 | 11 | 1.8 | 213 | 5.7 |
| Greater than 14 days | 0 | 0.0 | 52 | 0.8 | 7 | 1.1 | 244 | 6.5 |
| <i>Total</i> | <i>413</i> | <i>100.0</i> | <i>6,932</i> | <i>100.0</i> | <i>616</i> | <i>100.0</i> | <i>3,764</i> | <i>100.0</i> |

Figure 8 Trends in benchmark 2: Patients in the unstable phase for 3 days or less by setting

2.3 Outcome measure 3 – Change in pain

The Palliative Care Problem Severity Score (PCPSS) and Symptom Assessment Scale (SAS) provide two different perspectives of pain. The PCPSS is clinician rated and measures the severity of pain as a clinical problem while the SAS is patient rated and measures distress caused by pain. There are two benchmarks related to each tool: one relating to patients with an absent or mild score, and the other relating to patients with a moderate or severe score. Phase records must have valid start and end scores for the PCPSS and / or SAS clinical assessment tools to be included in the benchmarks.

Scores for PCPSS
0 absent
1 mild
2 moderate
3 severe

Scores for SAS
0 = absent distress
1-3 = mild distress
4-7 = moderate distress
8-10 = severe distress

Interpretation hint:

This outcome measure should be viewed in conjunction with Table 28 to Table 31 and Appendix B.

- Benchmark 3.1:** This benchmark relates to patients who have absent or mild pain at the start of their phase of palliative care, as rated via the PCPSS clinical tool. To meet this benchmark, 90% of these phases must end with the patient still experiencing only absent or mild pain.
- Benchmark 3.2:** This benchmark relates to patients who have moderate or severe pain at the start of their phase of palliative care, as rated via the PCPSS clinical tool. To meet this benchmark, 60% of these phases must end with the patient’s pain reduced to being absent or mild.
- Benchmark 3.3:** This benchmark relates to patients who have absent or mild distress from pain at the start of their phase of palliative care, as rated via the SAS clinical tool. To meet this benchmark, 90% of these phases must end with the patient still experiencing only absent or mild distress from pain.
- Benchmark 3.4:** This benchmark relates to patients who have moderate or severe distress from pain at the start of their phase of palliative care, as rated via the SAS clinical tool. To meet this benchmark, 60% of these phases must end with the patient’s distress from pain reduced to absent or mild.

Table 5 Summary of outcome measure 3

| Benchmarks: change in pain | Inpatient | | | | Community | | | |
|---------------------------------|-------------|------|--------------|------|-------------|------|--------------|------|
| | WA Services | | All Services | | WA Services | | All Services | |
| | N* | % | N* | % | N* | % | N* | % |
| Benchmark 3.1: PCPSS (severity) | 1,590 | 93.0 | 17,454 | 91.7 | 7,142 | 87.3 | 16,664 | 85.0 |
| Benchmark 3.2: PCPSS (severity) | 425 | 58.4 | 5,276 | 59.2 | 1,218 | 72.7 | 4,172 | 51.7 |
| Benchmark 3.3: SAS (distress) | 1,421 | 90.4 | 14,607 | 89.9 | 6,727 | 84.2 | 15,766 | 82.0 |
| Benchmark 3.4: SAS (distress) | 590 | 60.2 | 6,460 | 54.1 | 1,611 | 65.2 | 5,307 | 48.6 |

*Total number of phases included in this benchmark.

Figure 9 Trends in benchmark 3.1: Patients with absent or mild pain at phase start, remaining absent or mild at phase end by setting

Figure 10 Trends in benchmark 3.2: Patients with moderate or severe pain at phase start, with absent or mild at phase end by setting

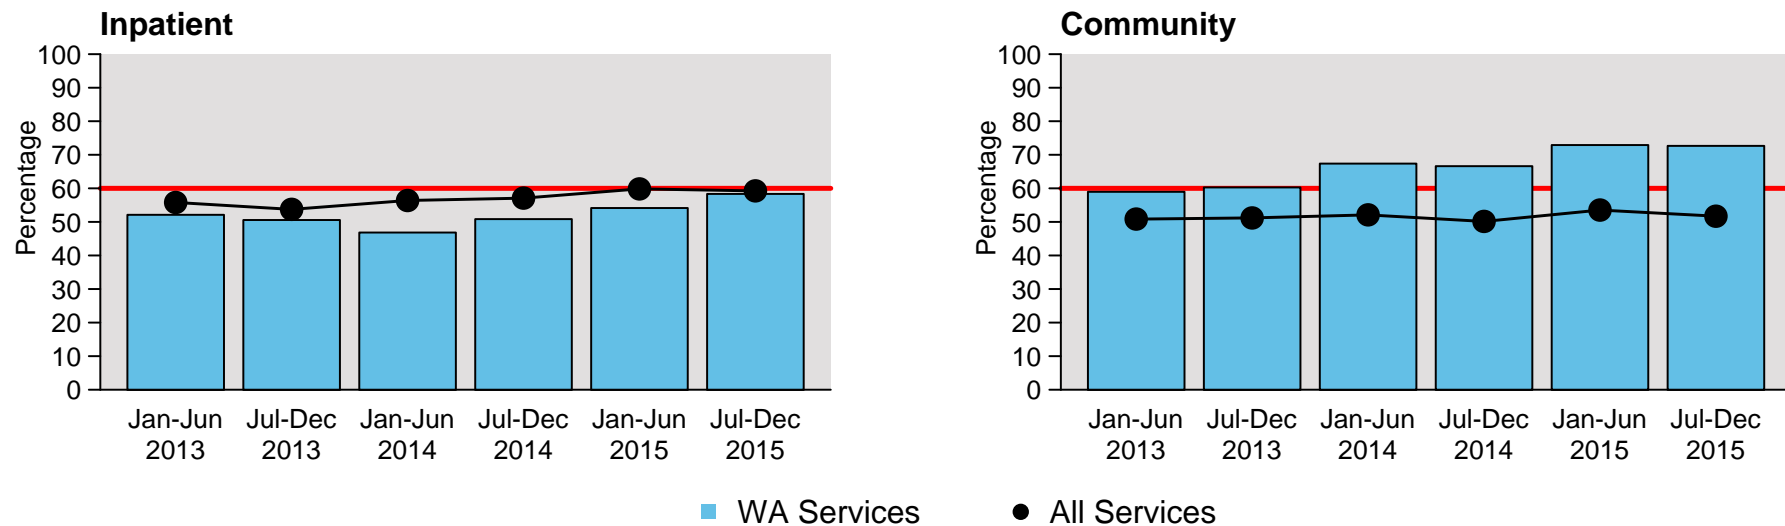

Figure 11 Trends in benchmark 3.3: Patients with absent or mild distress from pain at phase start, remaining absent or mild at phase end by setting

Figure 12 Trends in benchmark 3.4: Patients with moderate or severe distress from pain at phase start, with absent or mild distress from pain at phase end by setting

2.4 Outcome measure 4 – Change in symptoms relative to the baseline national average (X-CAS)

Outcome measure 4 includes a suite of case-mix adjusted scores used to compare the change in symptoms for similar patients i.e. patients in the same phase who started with the same level of symptom. Eight symptoms are included in this report and the baseline reference period is January to June 2014. The suite of benchmarks included in outcome measure 4 are generally referred to as X-CAS – CAS standing for *Case-mix Adjusted Score*, and the X to represent that multiple symptoms are included. As X-CAS looks at change in symptom, they are only able to be calculated on phases which ended in phase change or discharge (as the phase end scores are required to determine the change).

Table 6 Summary of outcome measure 4 – inpatient setting

| Clinical Tool | Benchmark: Symptom | WA Services | | | | All Services | | | |
|---------------------|--------------------------------|-------------|------------------------------|-----------------------------------|-----------------------------------|--------------|------------------------------|-----------------------------------|-----------------------------------|
| | | X-CAS | N phases included in measure | N phases at or above the baseline | % phases at or above the baseline | X-CAS | N phases included in measure | N phases at or above the baseline | % phases at or above the baseline |
| PCPSS (severity) | 4.1: Pain | 0.16 | 2,015 | 1,372 | 68.1 | 0.11 | 22,730 | 14,587 | 64.2 |
| | 4.2: Other symptoms | 0.27 | 1,666 | 1,230 | 73.8 | 0.21 | 22,356 | 16,327 | 73.0 |
| | 4.3: Family / carer | 0.18 | 1,609 | 1,125 | 69.9 | 0.14 | 22,230 | 15,037 | 67.6 |
| | 4.4: Psychological / spiritual | 0.18 | 2,007 | 1,267 | 63.1 | 0.16 | 22,710 | 13,893 | 61.2 |
| SAS (distress) | 4.5: Pain | 0.46 | 2,011 | 1,458 | 72.5 | 0.33 | 21,067 | 14,494 | 68.8 |
| | 4.6: Nausea | 0.27 | 1,978 | 1,806 | 91.3 | 0.19 | 20,941 | 18,379 | 87.8 |
| | 4.7: Breathing problems | 0.49 | 1,992 | 1,584 | 79.5 | 0.29 | 21,007 | 16,467 | 78.4 |
| | 4.8: Bowel problems | 0.32 | 1,964 | 1,578 | 80.3 | 0.21 | 20,953 | 16,112 | 76.9 |

Interpretation hint:

The X-CAS measures are calculated relative to a baseline reference period (currently January to June 2014). As a result:

If X-CAS is greater than 0 then on average, patients' change in symptom was better than similar patients in the baseline reference period.

If X-CAS is equal to 0 then on average, patients' change in symptom was about the same as similar patients in the baseline reference period.

If X-CAS is less than 0 then on average, patients' change in symptom was worse than similar patients in the baseline reference period.

Table 7 Summary of outcome measure 4 – community setting

| Clinical Tool | Benchmark: Symptom | WA Services | | | | All Services | | | |
|---------------------|--------------------------------|-------------|------------------------------|-----------------------------------|-----------------------------------|--------------|------------------------------|-----------------------------------|-----------------------------------|
| | | X-CAS | N phases included in measure | N phases at or above the baseline | % phases at or above the baseline | X-CAS | N phases included in measure | N phases at or above the baseline | % phases at or above the baseline |

Section 3 Descriptive analysis

This section provides descriptive information of the data submitted by Western Australian services at each of the three levels – patient, episode and phase.

Patient level information describes demographics such as Indigenous status, sex, preferred language and country of birth. This information about the patient provides a context to the episode and phase level information and enhances the meaningfulness of patient outcomes.

Episode level information describes the setting of palliative care service provision. It also includes information relating to the facility or organisation that has referred the patient, how an episode starts and ends, and the setting in which the patient died.

Phase level information describes the clinical condition of the patient during the episode, using five clinical assessment tools. These are phase of illness, the patient's functional status and performance, pain and other common symptoms, the patient's psychological / spiritual and family / carer domain.

Summaries of the national data are included for comparative purposes.

3.1 Profile of palliative care patients

PCOC defines a patient as a person for whom a palliative care service accepts responsibility for assessment and / or treatment as evidenced by the existence of a medical record. Family and carers are included in this definition if interventions relating to them are recorded in the patient medical record.

Table 8 shows the Indigenous status for the patients in Western Australian services and nationally.

Table 8 Indigenous status

| Indigenous status | WA Services | | All Services | |
|--|--------------|--------------|---------------|--------------|
| | N | % | N | % |
| Aboriginal but not Torres Strait Islander origin | 45 | 1.4 | 234 | 1.2 |
| Torres Strait Islander but not Aboriginal origin | 2 | 0.1 | 17 | 0.1 |
| Both Aboriginal and Torres Strait Islander origin | 3 | 0.1 | 9 | 0.0 |
| Neither Aboriginal nor Torres Strait Islander origin | 3,193 | 96.2 | 19,150 | 96.6 |
| Not stated / inadequately described | 77 | 2.3 | 419 | 2.1 |
| Total | 3,320 | 100.0 | 19,829 | 100.0 |

Table 9 shows the breakdown of deaths for the patients in Western Australian services and nationally for the reporting period. All inpatient deaths are reported in the hospital category while the community deaths are reported in the private residence and residential aged care facility categories.

Table 9 Place of death

| Place of death | WA Services | | All Services | |
|-------------------------------------|--------------|--------------|--------------|--------------|
| | N | % | N | % |
| Private residence | 701 | 45.1 | 2,200 | 22.4 |
| Residential aged care facility | 208 | 13.4 | 694 | 7.1 |
| Hospital | 644 | 41.5 | 6,882 | 70.1 |
| Not stated / inadequately described | 0 | 0.0 | 43 | 0.4 |
| Total | 1,553 | 100.0 | 9,819 | 100.0 |

The following two tables show the country of birth and the preferred language respectively for the patients in Western Australian services and nationally. To allow for comparison with the broader Australian community the list of country of birth in Table 10 is in descending order of the most frequent country of birth according to the 2011 Census (e.g. India was the fifth most common country of birth in the 2011 Census). The same approach has been taken with Table 11 (e.g. Italian was the fifth most frequently spoken language in the 2011 census). All other countries and languages have been grouped together to form the categories ‘All other countries’ and ‘All other languages’ respectively.

Table 10 Country of birth

Table 12 and Table 13 present a breakdown of malignant and non-malignant diagnosis for the patients in Western Australian services and at the national level. The primary diagnosis is the principal life limiting illness responsible for the patient requiring palliative care.

The primary diagnosis was not stated for 20 (0.6%) patients in Western Australian services and was not stated for 55 (0.3%) patients nationally.

Table 12 Primary diagnosis - malignant

3.2 Profile of palliative care episodes

An episode of care is a period of contact between a patient and a palliative care service that is provided by one palliative care service and occurs in one setting – for the purposes of this report, either as an inpatient or community patient.

An episode of palliative care starts on the date when the comprehensive palliative care assessment is undertaken and documented using the five clinical assessment tools.

An episode of palliative care ends when:

- the patient is formally separated from the current setting of care (e.g. from community to inpatient) or
- the patient dies or
- the principal clinical intent of the care changes and the patient is no longer receiving palliative care.

Table 14 below presents the number and percentage of episodes by age group and sex for the patients seen by Western Australian services and at the national level. Age has been calculated as at the beginning of each episode.

Table 14 Age group by sex

| Age group | WA Services | | | | All Services | | | |
|-------------------------------------|--------------|--------------|--------------|--------------|---------------|--------------|---------------|--------------|
| | Male | | Female | | Male | | Female | |
| | N | % | N | % | N | % | N | % |
| < 15 | 8 | 0.4 | 4 | 0.2 | 42 | 0.3 | 39 | 0.3 |
| 15 - 24 | 18 | 0.8 | 6 | 0.3 | 61 | 0.5 | 24 | 0.2 |
| 25 - 34 | 21 | 1.0 | 20 | 1.0 | 109 | 0.8 | 100 | 0.8 |
| 35 - 44 | 55 | 2.5 | 71 | 3.7 | 329 | 2.4 | 383 | 3.2 |
| 45 - 54 | 109 | 5.0 | 134 | 6.9 | 813 | 6.0 | 1,061 | 9.0 |
| 55 - 64 | 345 | 15.8 | 278 | 14.3 | 2,202 | 16.3 | 1,853 | 15.7 |
| 65 - 74 | 598 | 27.3 | 422 | 21.8 | 3,528 | 26.1 | 2,689 | 22.8 |
| 75 - 84 | 586 | 26.8 | 490 | 25.3 | 3,940 | 29.1 | 3,066 | 26.0 |
| 85+ | 450 | 20.5 | 514 | 26.5 | 2,504 | 18.5 | 2,587 | 21.9 |
| Not stated / inadequately described | 0 | 0.0 | 0 | 0.0 | 0 | 0.0 | 0 | 0.0 |
| Total | 2,190 | 100.0 | 1,939 | 100.0 | 13,528 | 100.0 | 11,802 | 100.0 |

Note: Records where sex was not stated or inadequately described are excluded from the table.

Referral source refers to the facility or organisation from which the patient was referred for each episode of care. Table 15 presents referral source by setting.

Table 15 Referral source by setting

| Referral source | Inpatient | | | | Community | | | |
|--|--------------|--------------|---------------|--------------|--------------|--------------|---------------|--------------|
| | WA Services | | All Services | | WA Services | | All Services | |
| | N | % | N | % | N | % | N | % |
| Public hospital | 766 | 60.1 | 7,655 | 59.1 | 1,215 | 42.6 | 6,632 | 53.6 |
| Private hospital | 64 | 5.0 | 1,082 | 8.4 | 391 | 13.7 | 1,275 | 10.3 |
| Outpatient clinic | 4 | 0.3 | 83 | 0.6 | 0 | 0.0 | 129 | 1.0 |
| General medical practitioner | 30 | 2.4 | 287 | 2.2 | 902 | 31.6 | 1,929 | 15.6 |
| Specialist medical practitioner | 82 | 6.4 | 574 | 4.4 | 6 | 0.2 | 761 | 6.1 |
| Community-based palliative care agency | 295 | 23.1 | 2,732 | 21.1 | 0 | 0.0 | 100 | 0.8 |
| Community-based service | 2 | 0.2 | 71 | 0.5 | 5 | 0.2 | 139 | 1.1 |
| Residential aged care facility | 5 | 0.4 | 59 | 0.5 | 261 | 9.1 | 772 | 6.2 |
| Self, carer(s), family or friends | 23 | 1.8 | 176 | 1.4 | 10 | 0.4 | 362 | 2.9 |
| Other | 2 | 0.2 | 153 | 1.2 | 64 | 2.2 | 248 | 2.0 |
| Not stated / inadequately described | 2 | 0.2 | 82 | 0.6 | 0 | 0.0 | 30 | 0.2 |
| Total | 1,275 | 100.0 | 12,954 | 100.0 | 2,854 | 100.0 | 12,377 | 100.0 |

Table 16 provides a summary of the time between referral to first contact by setting of care. The time from referral to first contact is calculated as the time from the date of referral received to either the date of first contact (if provided) or the episode start date.

Table 16 Referral to first contact by setting

| Time (in days) | Inpatient | | | | Community | | | |
|---------------------------|-------------|------|--------------|------|-------------|------|--------------|------|
| | WA Services | | All Services | | WA Services | | All Services | |
| | N | % | N | % | N | % | N | % |
| Same day or following day | 1,226 | 96.2 | 12,146 | 93.8 | 1,561 | 54.7 | 6,325 | 51.2 |
| 2-7 days | 47 | 3.7 | 668 | 5.2 | 1,128 | 39.5 | 4,290 | 34.7 |
| 8-14 days | 2 | 0.2 | 77 | 0.6 | 120 | 4.2 | 994 | 8.0 |
| Greater than 14 days | 0 | 0.0 | 57 | 0.4 | 45 | 1.6 | 756 | 6.1 |
| Average | 1.1 | na | 1.2 | na | 2.4 | na | 2.9 | na |
| Median | 1 | na | 1 | na | 1 | na | 1 | na |

Note: Episodes where referral date was not recorded are excluded from the table. In addition, all records where time from referral to first contact was greater than 90 days were considered to be atypical and were assumed to equal 90 days for the purpose of calculating the average and median time.

Table 17 gives a summary of the length of episode for patients in Western Australian services and nationally. Table 18 details the length of episode by setting. The length of episode is calculated as the number of days between the episode start date and the episode end date. Bereavement phases are excluded from the calculation and episodes that remain open at the end of the reporting period (and hence do not have an episode end date) are also excluded.

Table 17 Length of episode (in days) summary by setting

| Length of episode | Inpatient | | Community | |
|---------------------------|-------------|--------------|-------------|--------------|
| | WA Services | All Services | WA Services | All Services |
| Average length of episode | 9.0 | 10.3 | 33.2 | 37.8 |
| Median length of episode | 5.0 | 6.0 | 22.0 | 26.0 |

Note: Records where length of episode was greater than 180 days were considered to be atypical and are excluded from the average calculations. Only episodes ending during the reporting period are included.

Table 18 Length of episode (in days) by setting

| Length of episode | Inpatient | | | | Community | | | |

| End of consultative episode – inpatient episode ongoing | 33 | 2.6 | 367 | 2.9 |
| Other | 60 | 4.7 | 109 | 0.9 |
| Not stated / inadequately described | 0 | 0.0 | 9 | 0.1 |
| Total | 1,266 | 100.0 | 12,810 | 100.0 |

Note: Only episodes ending during the reporting period are included.

* includes: discharged to usual accommodation, discharged to other than usual accommodation.

** includes: change from palliative care to acute care – different ward, change from palliative care to acute care – same ward.

Table 21 How episodes start – community setting

| Episode start mode | WA Services | | All Services | |
|---|--------------|--------------|---------------|--------------|
| | N | % | N | % |
| Admitted from inpatient palliative care | 1,793 | 62.8 | 4,589 | 37.1 |
| Other* | 1,061 | 37.2 | 7,728 | 62.4 |
| Not stated / inadequately described | 0 | 0.0 | 60 | 0.5 |
| Total | 2,854 | 100.0 | 12,377 | 100.0 |

*includes: patient was not transferred from being an overnight patient.

Table 22 How episodes end – community setting

| Episode end mode | WA Services | | All Services | |
|---|--------------|--------------|---------------|--------------|
| | N | % | N | % |
| Admitted for inpatient palliative care | 99 | 4.2 | 3,478 | 31.5 |
| Admitted for inpatient acute care | 1,032 | 43.4 | 3,093 | 28.0 |
| Admitted to another palliative care service | 9 | 0.4 | 61 | 0.6 |
| Admitted to primary health care | 47 | 2.0 | 234 | 2.1 |
| Discharged / case closure | 280 | 11.8 | 1,136 | 10.3 |
| Death | 909 | 38.2 | 2,937 | 26.6 |
| Other | 2 | 0.1 | 86 | 0.8 |
| Not stated / inadequately described | 0 | 0.0 | 18 | 0.2 |
| Total | 2,378 | 100.0 | 11,043 | 100.0 |

Note: Only episodes ending during the reporting period are included.

3.3 Profile of palliative care phases

The palliative care phase type describes the stage of the patient’s illness and provides a clinical indication of the level of care a patient requires. The palliative care phase is determined by a holistic clinical assessment which considers the needs of the patients and their family and carers. A patient may move back and forth between the stable, unstable, deteriorating and terminal phase types and these may occur in any sequence. See Appendix D for more information on the definition of palliative care phase.

The clinical assessments are assessed daily (or at each visit) and are reported on admission, when the phase changes and at discharge.

Table 23 Number of phases by phase type and setting

| Phase type | Inpatient | | | | Community | | | |
|---------------|--------------|--------------|---------------|--------------|--------------|--------------|---------------|--------------|
| | WA Services | | All Services | | WA Services | | All Services | |
| | N | % | N | % | N | % | N | % |
| Stable | 661 | 24.2 | 7,783 | 25.8 | 3,601 | 36.5 | 10,579 | 37.3 |
| Unstable | 413 | 15.1 | 6,932 | 22.9 | 616 | 6.3 | 3,764 | 13.3 |
| Deteriorating | 1,073 | 39.3 | 9,433 | 31.2 | 4,754 | 48.2 | 11,609 | 41.0 |
| Terminal | 582 | 21.3 | 6,069 | 20.1 | 883 | 9.0 | 2,378 | 8.4 |
| Total | 2,729 | 100.0 | 30,217 | 100.0 | 9,854 | 100.0 | 28,330 | 100.0 |

Note: Bereavement phases have been excluded due to inconsistent data collection and bereavement practices. Bereavement phases are not included in the total phases count.

Table 24 Average phase length (in days) by phase type and setting

| Phase type | Inpatient | | Community | |
|---------------|-------------|--------------|-------------|--------------|
| | WA Services | All Services | WA Services | All Services |
| Stable | 6.5 | 7.3 | 14.5 | 20.9 |
| Unstable | 1.4 | 2.2 | 1.9 | 4.2 |
| Deteriorating | 5.0 | 5.0 | 9.0 | 12.9 |
| Terminal | 2.2 | 2.0 | 2.8 | 2.8 |

Note: Phase records where phase length was greater than 90 days were considered to be atypical and are excluded from the average calculations.

Table 25 presents information relating to the manner in which stable phases ended, both for Western Australian services and nationally. A stable phase will end if a patient moves into a different phase (phase change), is discharged or dies. Figure 17 summarises the movement of patients out of the stable phase for the inpatient and community settings. This movement from one phase to another is referred to as phase progression and is derived by PCOC.

Similar information is presented for the unstable (Table 26, Figure 18), deteriorating (Table 27, Figure 19) and terminal (Table 28, Figure 20) phases on the following pages.

Table 25 How stable phases end – by setting

| How stable phases end | Inpatient | | | | Community | | | |
|-------------------------------------|-------------|--------------|--------------|--------------|--------------|--------------|---------------|--------------|
| | WA Services | | All Services | | WA Services | | All Services | |
| | N | % | N | % | N | % | N | % |
| Patient moved into another phase | 297 | 44.9 | 3,830 | 49.2 | 2,974 | 82.6 | 7,018 | 66.3 |
| Discharge / case closure | 359 | 54.3 | 3,873 | 49.8 | 557 | 15.5 | 3,268 | 30.9 |
| Died | 5 | 0.8 | 75 | 1.0 | 70 | 1.9 | 261 | 2.5 |
| Not stated / inadequately described | 0 | 0.0 | 5 | 0.1 | 0 | 0.0 | 32 | 0.3 |
| Total | 661 | 100.0 | 7,783 | 100.0 | 3,601 | 100.0 | 10,579 | 100.0 |

Figure 20 Terminal phase progression

The Palliative Care Problem Severity Score (PCPSS) is a clinician rated screening tool to assess the overall severity of problems within four key palliative care domains (pain, other symptoms, psychological / spiritual and family / carer). The ratings are: 0 - absent, 1 - mild, 2 - moderate and 3 - severe.

Table 29 and Table 30 show the percentage scores for the inpatient and community settings, respectively, for both Western Australian services and nationally. Alternative graphical representations of PCPSS profile by phase type can be found in Appendix B.

Table 29 Profile of PCPSS at beginning of phase by phase type – inpatient setting (percentages)

| Phase type | Problem severity | WA Services | | | | All Services | | | |
|---------------|---------------------------|-------------|------|----------|--------|--------------|------|----------|--------|
| | | Absent | Mild | Moderate | Severe | Absent | Mild | Moderate | Severe |
| Stable | Pain | 56.9 | 35.9 | 6.5 | 0.6 | 47.7 | 38.9 | 11.6 | 1.8 |
| | Other symptoms | 39.6 | 42.2 | 16.7 | 1.6 | 30.2 | 51.5 | 16.2 | 2.1 |
| | Psychological / spiritual | 44.8 | 45.7 | 8.7 | 0.8 | 41.2 | 47.9 | 9.5 | 1.4 |
| | Family / carer | 51.2 | 39.0 | 7.8 | 2.0 | 46.4 | 41.6 | 9.9 | 2.0 |
| Unstable | Pain | 28.6 | 26.5 | 26.0 | 18.9 | 31.2 | 32.3 | 25.5 | 10.9 |
| | Other symptoms | 25.4 | 24.6 | 35.5 | 14.5 | 17.4 | 38.0 | 32.9 | 11.7 |
| | Psychological / spiritual | 25.4 | 45.0 | 20.3 | 9.2 | 30.2 | 45.3 | 19.6 | 4.9 |
| | Family / carer | 26.8 | 42.1 | 22.1 | 9.1 | 34.1 | 40.8 | 19.4 | 5.7 |
| Deteriorating | Pain | 43.4 | 34.8 | 17.8 | 3.9 | 40.3 | 37.8 | 17.1 | 4.8 |
| | Other symptoms | 31.2 | 34.0 | 28.0 | 6.8 | 21.3 | 44.0 | 28.2 | 6.5 |
| | Psychological / spiritual | 33.0 | 42.7 | 21.3 | 3.1 | 33.6 | 47.4 | 15.9 | 3.0 |
| | Family / carer | 33.8 | 40.7 | 22.0 | 3.4 | 32.4 | 43.1 | 19.7 | 4.9 |
| Terminal | Pain | 60.6 | 27.0 | 10.5 | 1.9 | 51.8 | 32.8 | 12.3 | 3.1 |
| | Other symptoms | 50.2 | 23.9 | 19.0 | 6.9 | 40.3 | 35.5 | 17.9 | 6.4 |
| | Psychological / spiritual | 62.2 | 27.2 | 8.7 | 1.9 | 57.2 | 31.3 | 8.9 | 2.6 |
| | Family / carer | 25.1 | 38.5 | 33.3 | 3.1 | 27.4 | 39.1 | 25.2 | 8.2 |

Table 30 Profile of PCPSS at beginning of phase by phase type –community setting (percentages)

| Phase type | Problem severity | WA Services | | | | All Services | | | |
|---------------|---------------------------|-------------|------|----------|--------|--------------|------|----------|--------|
| | | Absent | Mild | Moderate | Severe | Absent | Mild | Moderate | Severe |
| Stable | Pain | 45.2 | 52.1 | 2.6 | 0.1 | 41.0 | 51.6 | 6.9 | 0.5 |
| | Other symptoms | 17.3 | 73.5 | 9.0 | 0.2 | 16.4 | 67.5 | 15.1 | 1.0 |
| | Psychological / spiritual | 34.0 | 60.3 | 5.6 | 0.1 | 30.2 | 59.7 | 9.4 | 0.7 |
| | Family / carer | 43.0 | 50.4 | 6.4 | 0.2 | 28.9 | 56.0 | 13.6 | 1.5 |
| Unstable | Pain | 24.5 | 25.5 | 27.8 | 22.2 | 18.4 | 30.4 | 34.7 | 16.5 |
| | Other symptoms | 4.4 | 25.3 | 51.8 | 18.5 | 4.7 | 29.7 | 50.6 | 15.0 |
| | Psychological / spiritual | 13.0 | 45.6 | 34.9 | 6.5 | 13.4 | 49.3 | 32.0 | 5.3 |
| | Family / carer | 17.6 | 31.9 | 43.6 | 7.0 | 11.8 | 36.1 | 42.0 | 10.1 |
| Deteriorating | Pain | 32.4 | 48.5 | 17.9 | 1.2 | 28.8 | 50.5 | 18.7 | 2.1 |
| | Other symptoms | 8.9 | 53.8 | 35.8 | 1.5 | 7.4 | 52.4 | 36.7 | 3.6 |
| | Psychological / spiritual | 19.8 | 60.2 | 19.2 | 0.7 | 17.8 | 60.2 | 20.2 | 1.8 |
| | Family / carer | 26.0 | 53.8 | 18.7 | 1.5 | 17.1 | 52.2 | 26.6 | 4.0 |
| Terminal | Pain | 46.3 | 34.8 | 16.1 | 2.8 | 38.0 | 43.1 | 15.6 | 3.3 |
| | Other symptoms | 29.3 | 43.8 | 22.5 | 4.3 | 23.6 | 43.1 | 27.1 | 6.2 |
| | Psychological / spiritual | 46.3 | 40.7 | 11.4 | 1.6 | 42.3 | 42.1 | 13.3 | 2.3 |
| | Family / carer | 18.3 | 47.3 | 31.0 | 3.4 | 11.3 | 42.2 | 37.4 | 9.2 |

The Symptom Assessment Scale (SAS) is a patient rated (or proxy) assessment tool and reports a level of distress using a numerical rating scale from 0 - no distress to 10 - worst possible distress. The SAS reports on distress from seven symptoms, these being difficulty sleeping, appetite problems, nausea, bowel problems, breathing problems, fatigue and pain. It provides a clinical picture of these seven symptoms from the patient's perspective. The SAS scores are grouped in Table 31 and Table 32 on the following pages using the same categories as the PCPSS i.e. absent (0), mild (1-3), moderate (4-7) and severe (8-10). Alternative graphical representations of the SAS profile by phase type can be found in Appendix B.

Table 31 Profile of SAS scores at beginning of phase by phase type – inpatient setting (percentages)

| Phase type | Symptom distress | WA Services | | | | All Services | | | |
|---------------|---------------------|-------------|------------|----------------|---------------|--------------|------------|----------------|---------------|
| | | 0 (Absent) | 1-3 (Mild) | 4-7 (Moderate) | 8-10 (Severe) | 0 (Absent) | 1-3 (Mild) | 4-7 (Moderate) | 8-10 (Severe) |
| Stable | Difficulty sleeping | 71.8 | 16.6 | 10.9 | 0.8 | 72.1 | 15.8 | 10.2 | 1.9 |
| | Appetite problems | 59.6 | 25.5 | 13.2 | 1.7 | 60.7 | 22.7 | 14.4 | 2.2 |
| | Nausea | 85.9 | 10.1 | 3.4 | 0.6 | 82.1 | 11.1 | 6.0 | 0.9 |
| | Bowel problems | 65.8 | 21.6 | 10.1 | 2.5 | 66.0 | 20.1 | 11.5 | 2.5 |
| | Breathing problems | 61.2 | 22.4 | 14.0 | 2.3 | 67.6 | 17.9 | 12.0 | 2.5 |

The Australia-modified Karnofsky Performance Status (AKPS) is a measure of the patient’s overall performance status or ability to perform their activities of daily living. It is a single score between 0 and 100 assigned by a clinician based on observations of a patient’s ability to perform common tasks relating to activity, work and self-care. Table 33 shows the data for the AKPS at phase start.

Table 33 Australia-modified Karnofsky Performance Status (AKPS) at phase start by setting

| AKPS assessment at phase start | Inpatient | | | | Community | | | |
|--|--------------|--------------|---------------|--------------|--------------|--------------|---------------|--------------|
| | WA Services | | All Services | | WA Services | | All Services | |
| | N | % | N | % | N | % | N | % |
| 10 - Comatose or barely rousable | 342 | 12.5 | 3,278 | 10.8 | 386 | 3.9 | 983 | 3.5 |
| 20 - Totally bedfast and requiring extensive nursing care | 606 | 22.2 | 6,813 | 22.5 | 1,031 | 10.5 | 2,763 | 9.8 |
| 30 - Almost completely bedfast | 296 | 10.8 | 3,944 | 13.1 | 642 | 6.5 | 2,019 | 7.1 |
| 40 - In bed more than 50% of the time | 435 | 15.9 | 5,713 | 18.9 | 1,108 | 11.2 | 3,750 | 13.2 |
| 50 - Requires considerable assistance | 532 | 19.5 | 4,978 | 16.5 | 2,155 | 21.9 | 7,092 | 25.0 |
| 60 - Requires occasional assistance | 414 | 15.2 | 3,199 | 10.6 | 2,673 | 27.1 | 6,892 | 24.3 |
| 70 - Cares for self | 61 | 2.2 | 654 | 2.2 | 1,569 | 15.9 | 3,263 | 11.5 |
| 80 - Normal activity with effort | 21 | 0.8 | 213 | 0.7 | 259 | 2.6 | 722 | 2.5 |
| 90 - Able to carry on normal activity; minor signs or symptoms | 9 | 0.3 | 82 | 0.3 | 27 | 0.3 | 119 | 0.4 |
| 100 - Normal; no complaints; no evidence of disease | 1 | 0.0 | 5 | 0.0 | 4 | 0.0 | 12 | 0.0 |
| Not stated/inadequately described | 12 | 0.4 | 1,338 | 4.4 | 0 | 0.0 | 715 | 2.5 |
| Total | 2,729 | 100.0 | 30,217 | 100.0 | 9,854 | 100.0 | 28,330 | 100.0 |

The Resource Utilisation Groups – Activities of Daily Living (RUG-ADL) consists of four items (bed mobility, toileting, transfers and eating) and assesses the level of functional dependence. The RUG-ADL are assessed daily (or at each visit) and are reported on admission, when the phase changes and at discharge. Figure 21 and Figure 22 on the following two pages summarise the total RUG-ADL at the beginning of each phase for inpatients and community patients. The total score on the RUG-ADL ranges from a minimum of 4 (lowest level of functional dependency) to a maximum of 18 (highest level of functional dependency).

AKPS & RUG-ADL can be used together to provide a profile of both patient dependency, equipment requirements, need for allied health referrals and carer burden/respite requirements.

Figure 21 Total RUG-ADL at beginning of phase by phase type – inpatient setting

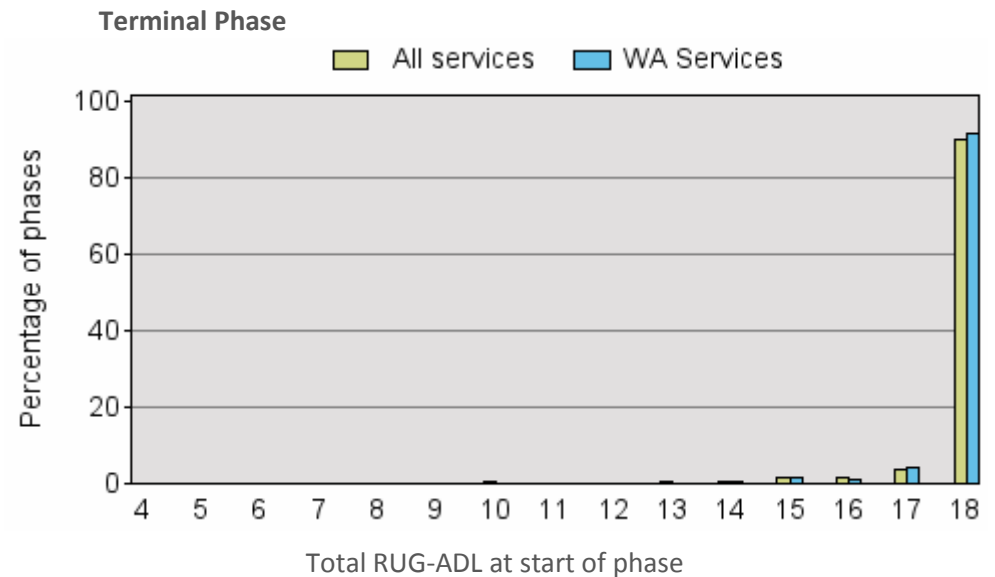

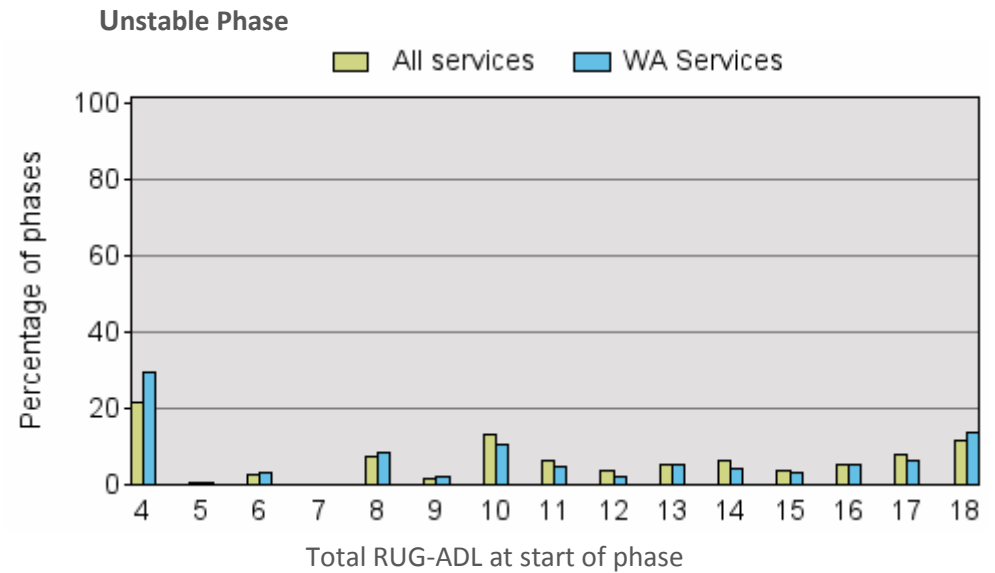

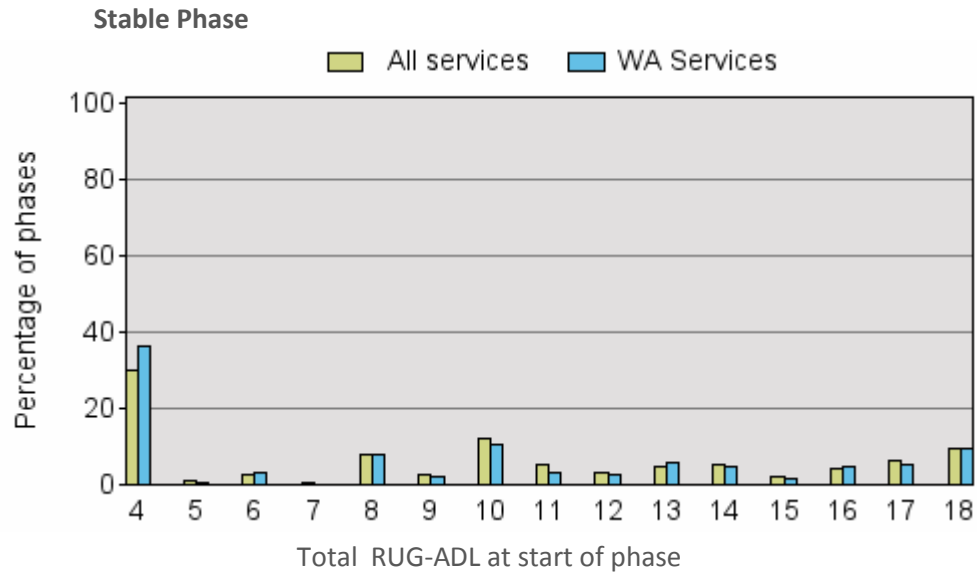

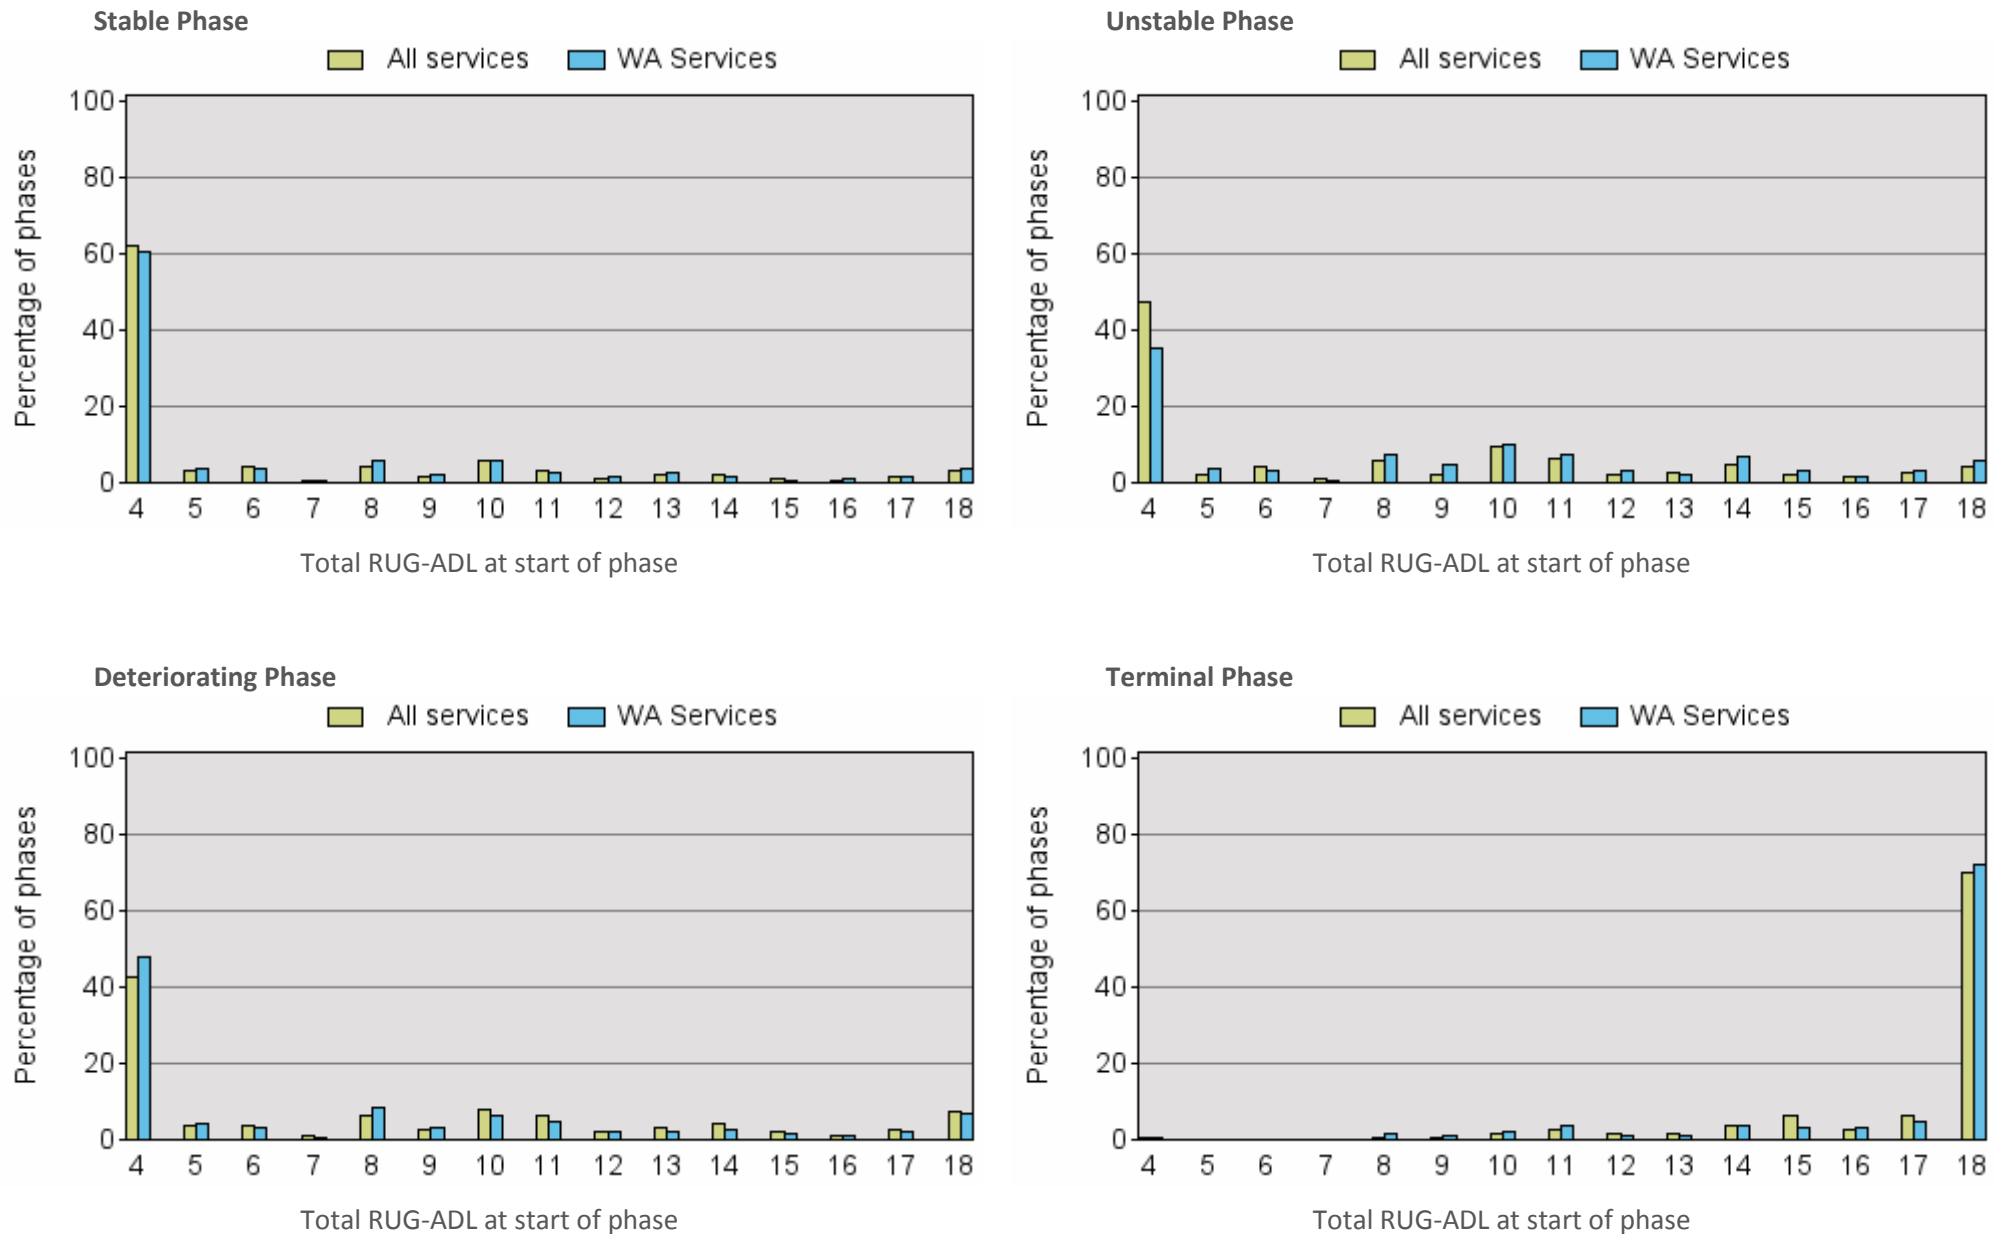

Figure 22 Total RUG-ADL at beginning of phase by phase type – community setting

Appendix A Summary of data included in this report

A1 Data summary

During the reporting period, data were provided for a total of 19,829 patients who between them had 25,331 episodes of care and 58,547 palliative care phases. These total numbers are determined by a data scoping method. This method looks at the phase level data first and includes all phases that ended within the current reporting period. The associated episodes and patients are then determined (Appendix C contains a more detailed explanation of this process). Table 34 shows the number of patients, episodes and phases included in this report – both for Western Australian services and nationally.

Table 34 Number and percentage of patients, episodes and phases by setting

| | Inpatient | | Community | | Total | |
|---|-------------|--------------|-------------|--------------|-------------|--------------|
| | WA Services | All Services | WA Services | All Services | WA Services | All Services |
| Number of patients* | 1,103 | 10,868 | 2,240 | 9,817 | 3,320 | 19,829 |
| Number of episodes | 1,275 | 12,954 | 2,854 | 12,377 | 4,129 | 25,331 |
| Number of phases** | 2,729 | 30,217 | 9,854 | 28,330 | 12,583 | 58,547 |
| Percentage of patients* | 33.2 | 54.8 | 67.5 | 49.5 | 100 | 100 |
| Percentage of episodes | 30.9 | 51.1 | 69.1 | 48.9 | 100 | 100 |
| Percentage of phases | 21.7 | 51.6 | 78.3 | 48.4 | 100 | 100 |
| Average number of phases per episode*** | 2.1 | 2.3 | 3.1 | 2.2 | 2.7 | 2.3 |

* Patients seen in both settings are only counted once in the total column and hence numbers/percentages may not add to the total.

** Bereavement phases are excluded from this count.

*** Average number of phases per episode is only calculated for closed episodes that started and ended within the reporting period and excludes bereavement phases.

Table 35 shows the number of completed episodes and phases by setting for each month in the current reporting period for Western Australian services.

Table 35 Number of completed episodes and phases by month and setting

| Setting | | Jul | Aug | Sep | Oct | Nov | Dec |
|-----------|---------------------------|-------|-------|-------|-------|-------|-------|
| Inpatient | No. of completed episodes | 232 | 206 | 181 | 210 | 202 | 235 |
| | No. of completed phases | 497 | 453 | 420 | 467 | 455 | 437 |
| Community | No. of completed episodes | 419 | 400 | 362 | 382 | 411 | 404 |
| | No. of completed phases | 1,669 | 1,621 | 1,550 | 1,604 | 1,588 | 1,822 |

Table 36 shows the number of patients, episodes and phases for Western Australian services over time and is reported by setting of care.

Table 36 Number of patients, episodes and phases by setting and reporting period

| | Inpatient | | | | | | Community | | | | | |
|---|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|--------------|
| | Jan-Jun 2013 | Jul-Dec 2013 | Jan-Jun 2014 | Jul-Dec 2014 | Jan-Jun 2015 | Jul-Dec 2015 | Jan-Jun 2013 | Jul-Dec 2013 | Jan-Jun 2014 | Jul-Dec 2014 | Jan-Jun 2015 | Jul-Dec 2015 |
| Number of patients* | 1,158 | 1,368 | 943 | 1,272 | 1,097 | 1,103 | 1,892 | 1,921 | 1,855 | 2,044 | 1,952 | 2,240 |
| Number of episodes | 1,369 | 1,612 | 1,153 | 1,463 | 1,233 | 1,275 | 2,426 | 2,489 | 2,412 | 2,602 | 2,434 | 2,854 |
| Number of phases** | 2,899 | 3,203 | 2,289 | 2,980 | 2,615 | 2,729 | 7,896 | 8,941 | 9,095 | 9,466 | 8,966 | 9,854 |
| Average number of phases per episode*** | 2.1 | 2.0 | 2.0 | 2.0 | 2.1 | 2.1 | 3.0 | 3.2 | 3.6 | 3.3 | 3.4 | 3.1 |

* Patients seen in both settings are only counted once in the total column and hence numbers/percentages may not add to the total.

** Bereavement phases are excluded from this count.

*** Average number of phases per episode is only calculated for closed episodes that started and ended within the reporting period and excludes bereavement phases.

A2 Data item completion

As shown in Table 37, Table 38 and Table 39 below, the rate of data completion is very high. In reviewing these tables, it is important to note that in some cases some data items are not required to be completed. For example, place of death is only required for patients who have died. Hence the complete column in the following tables only refers to the percentage of complete records where the data item was relevant.

PCOC strongly encourages services to complete and submit the whole data set on every patient as non-completion may result in services being excluded from relevant benchmarking activities or erroneous conclusions being drawn. Low completion of data items may also distort percentages and graphs in some sections.

Table 37 Item completion (per cent complete) - patient level

| Data item | WA Services | All Services |
|--------------------|-------------|--------------|
| Date of birth | 100.0 | 100.0 |
| Sex | 100.0 | 100.0 |
| Indigenous status | 97.7 | 97.9 |
| Country of birth | 98.5 | 98.6 |
| Preferred language | 99.0 | 99.1 |
| Primary diagnosis | 99.4 | 99.7 |

Note: This table is not split by setting to be consistent with the patient level analysis throughout this report.

Table 38 Item completion by setting (per cent complete) - episode level

| Data item | Inpatient | | Community | | Total | |
|--------------------------------|-------------|--------------|-------------|--------------|-------------|--------------|
| | WA Services | All Services | WA Services | All Services | WA Services | All Services |
| Date of first contact | 100.0 | 100.0 | 100.0 | 99.9 | 100.0 | 99.9 |
| Referral date | 100.0 | 100.0 | 100.0 | 99.9 | 100.0 | 99.9 |
| Referral source | 99.8 | 99.4 | 100.0 | 99.8 | 100.0 | 99.6 |
| Date ready for care | 100.0 | 97.2 | 100.0 | 96.9 | 100.0 | 97.0 |
| Mode of episode start | 99.9 | 100.0 | 100.0 | 99.5 | 100.0 | 99.7 |
| Accommodation at episode start | 100.0 | 99.9 | 100.0 | 95.5 | 100.0 | 97.2 |
| Episode end date* | 99.8 | 99.9 | 88.7 | 92.5 | 92.1 | 96.2 |
| Mode of episode end | 100.0 | 99.9 | 100.0 | 99.8 | 100.0 | 99.9 |
| Accommodation at episode end | 99.8 | 97.8 | 100.0 | 92.9 | 99.9 | 96.6 |
| Place of death | na | na | 100.0 | 98.5 | 100.0 | 98.5 |

* Episode end date item completion may be affected by open episodes.

Table 39 Item completion by setting (per cent complete) - phase level

| Data item | Sub-Category (where applicable) | At phase start | | | | | | At discharge | | | | | |

Figure 24 Profile of SAS and PCPSS by phase type for WA Services – community setting

Appendix C Data scoping method

The method used to determine which data is included in a PCOC report looks at the phase level records first. All phase records that end within the 6 month reporting period are deemed to be “in scope” and would be included in the report. The episode and patient records associated with these phases are also deemed to be “in scope” and hence would also be included in the report. Figure 25 below displays four examples to help visualize this process.

Figure 25 Diagram of the PCOC data scoping method

In Example 1, the patient (represented by the green line) has one episode (represented by the blue line). This episode has six phases (represented by the purple line segments). All six phases would be included in the report as they all end within the reporting period. Hence, the episode and patient would also be in the report.

In Example 2, the patient has two episodes - the first having six phases and the second having seven phases. Looking at the phases associated with the first episode, the last four will be included in the report (as they end within the reporting period). The first two phases would have been included in the previous report. For the phases relating to the second episode, only the first three end within the reporting period, so only these would be included in the report. The following four phases would be included in the next report. Both of the episode records and the patient record would also be included in the report.

In Example 3, the patient has one episode and five phases. Only the last three phases will be included in the report as they are the only ones ending within the reporting period (the first two phases would have been included in the previous report). The episode and patient records would be included in the report.

In Example 4, the patient again has one episode and five phases. This time, only the first three phases will be included in the report (the last two phases will be included in the next report). Again, the episode and patient records would be included in the report.

Appendix D Palliative Care Phase definitions

| START | END |
|--|--|
| Stable | |
| <p>Patient problems and symptoms are adequately controlled by established plan of care and</p> <ul style="list-style-type: none"> Further interventions to maintain symptom control and quality of life have been planned and Family / carer situation is relatively stable and no new issues are apparent. | <p>The needs of the patient and / or family / carer increase, requiring changes to the existing plan of care.</p> |
| Unstable | |
| <p>An urgent change in the plan of care or emergency treatment is required because</p> <ul style="list-style-type: none"> Patient experiences a new problem that was not anticipated in the existing plan of care, and / or Patient experiences a rapid increase in the severity of a current problem; and / or Family / carers circumstances change suddenly impacting on patient care. | <ul style="list-style-type: none"> The new plan of care is in place, it has been reviewed and no further changes to the care plan are required. This does not necessarily mean that the symptom / crisis has fully resolved but there is a clear diagnosis and plan of care (i.e. patient is stable or deteriorating) and / or Death is likely within days (i.e. patient is now terminal). |
| Deteriorating | |
| <p>The care plan is addressing anticipated needs but requires periodic review because</p> <ul style="list-style-type: none"> Patients overall functional status is declining and Patient experiences a gradual worsening of existing problem and / or Patient experiences a new but anticipated problem and / or Family / carers experience gradual worsening distress that impacts on the patient care. | <ul style="list-style-type: none"> Patient condition plateaus (i.e. patient is now stable) or An urgent change in the care plan or emergency treatment and / or Family / carers experience a sudden change in their situation that impacts on patient care, and urgent intervention is required (i.e. patient is now unstable) or Death is likely within days (i.e. patient is now terminal). |
| Terminal | |
| <p>Death is likely within days.</p> | <ul style="list-style-type: none"> Patient dies or Patient condition changes and death is no longer likely within days (i.e. patient is now stable or deteriorating). |
| Bereavement – post death support | |
| <ul style="list-style-type: none"> The patient has died Bereavement support provided to family / carers is documented in the deceased patient's clinical record. | <ul style="list-style-type: none"> Case closure <p>Note: If counselling is provided to a family member or carer, they become a client in their own right.</p> |

Acknowledgements

- Contributions* PCOC wishes to acknowledge the valuable contribution made by the many staff from palliative care services who have spent considerable time collecting, collating and correcting the data and without whose effort this report would not be possible.
- Disclaimer* PCOC has made every effort to ensure that the data used in this report are accurate. Data submitted to PCOC are checked for anomalies and services are asked to re-submit data prior to the production of the PCOC report. We would advise readers to use their professional judgement in considering all information contained in this report.
- Copyright* This work is copyright. It may be produced in whole or in part for study or training purposes subject to the inclusion of an acknowledgement of the source. It is not for commercial usage or sale. Reproduction for purposes other than those above requires the written permission of PCOC.
