

PCOC

palliative care
outcomes collaboration

The Palliative Care Outcomes Collaboration (PCOC) is a nationally funded program designed to embed clinical assessment tools into routine clinical practice.

PCOC captures clinically meaningful information across a patient's disease trajectory to facilitate improved patient outcomes. This is achieved by:

Clinical assessment tools

Five standardised and validated tools.

Education

Suite of education programs.

National dataset for palliative care

Point of care assessments collected and submitted every six-months.

Outcome measurement and benchmarking

Sector formed patient outcome measures and associated benchmarks for palliative care services.

Patient outcome reporting

Reports provided every six-months for participating services, states and nationally.

National benchmark workshops

Benchmarking groups by service type brought together annually to reflect upon and share patient outcomes.

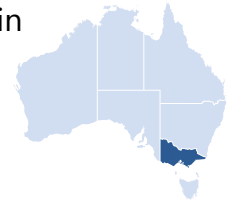

Quality improvement

Improvement facilitated through a range of activities.

Research

Research activities undertaken and assistance provided with data requests and data analysis.

In **January to June 2016** there were **23** specialist palliative care services in **Victoria** that submitted data to **PCOC**.

Of these:

13 provided care in a hospital or hospice

10 provided care in the home

Combined, these services

provided **7,874** episodes of care to **6,065** patients.

40.8% of care occurred in hospitals.

75.4% of patients had a malignant diagnosis.

During this period **2,640** patients died.

Of these, **65.0%** died in hospital.

There are **20** benchmarks. These are:

1 benchmark on **timeliness of care** that **16** services have met.

1 benchmark on **responsiveness to urgent needs** that **13** services have met.

6 benchmarks on **pain management*** where **12** services have met at least one benchmark.

9 benchmarks on **symptom management*** where **21** services have met at least one benchmark.

3 benchmarks on **family/carer problems*** where **12** services have met at least one benchmark.

*some benchmarks are case-mix adjusted.

For more information, detailed Victorian state results are available at www.pcoc.org.au
