

Care Planning Sub-Program First National Workshop

Professor Kathy Eagar

Director

Centre for Health Service Development (CHSD)

Welcome!

- ◆ To the first of 3 national workshops for care planning projects
- ◆ Acknowledgments
- ◆ Introductions - national evaluation team (NET), projects, Dept of Health and Ageing, collaborators

What is the Care Planning Sub-Program?

- ◆ A national program – one of four sub-programs of the Local Palliative Care Grants Program
- ◆ 33 different projects within the sub-program
- ◆ Implications
 - each project is part of a bigger picture
 - both the program and projects are being evaluated

Goals of the Care Planning Program

Improve care for patients who are living at home, through developing:

- ◆ Flexible models of service delivery
- ◆ Collaboration between services
- ◆ Smooth and appropriate transitions between services

Some projects address all three aims, some one or two

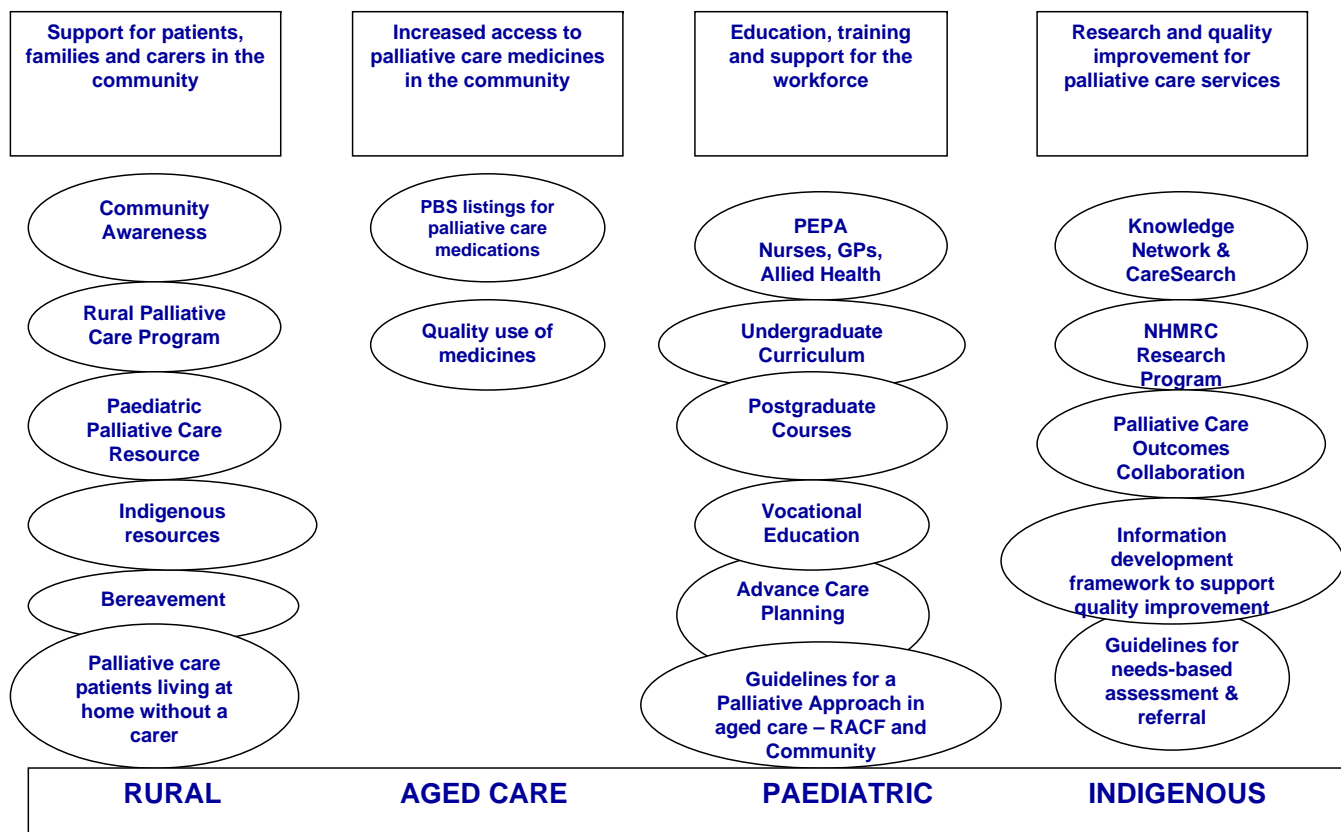

Purpose of Care Planning projects

- ◆ Achieve your own goals
 - during the project
 - after it finishes
- ◆ Contribute to the bigger picture:
 - build knowledge and expertise in palliative care planning across Australia
 - provide lessons for other projects, regions and States/Territories

Building on, not starting again

- ◆ Many valuable lessons already learned that are relevant to care planning (DoHA will provide the big picture later)
- ◆ So built on the lessons from Caring Communities, Rural PC etc

Purpose of the workshop

- ◆ Develop a shared understanding about :
 - the Care Planning Program
 - how the program will work
 - how the program, and projects, will be evaluated
- ◆ Work out communication channels
- ◆ Develop a shared language for the evaluation
- ◆ Networking and collaboration - why reinvent 33 wheels?
- ◆ Time out from busy schedules to focus on your own project

Breakout sessions: Day One

- ◆ Breakout 1: **Scope and diversity of the projects**
 - Who is your target group and in what setting?
 - What improvements will your project make?
 - What resources will you develop?
- ◆ Breakout 2: **Applying the palliative care standards**
 - What standards relate to your project and how do they 'fit'?
 - How could you use these standards?

Breakout sessions: Day Two

◆ Breakout 3: **Project evaluation**

- What impacts and outcomes do you expect?
- How will you measure them?
- What help do you need?

◆ Breakout 4: **Change management**

- What strategies are needed for your project?
- How will you address areas of difficulty, resistance or tension?
- How can you ensure changes are sustained over the long term?

◆ Breakout 5: **Support for your project**

Purpose of the breakout sessions

Main workshop mechanism for:

- ◆ Extending our thinking about projects
- ◆ Addressing key components of each project including standards, evaluation and change management
- ◆ Peer consultancy forum
- ◆ Building a community of practice
- ◆ Sharing, sharing and more sharing

How we will run the breakouts

Each session will involve:

- ◆ A scribe – your NET person
- ◆ A facilitator – your NET person
- ◆ 3-4 questions to discuss and respond to
- ◆ Working through one question at a time
- ◆ Scribe keeps a record on butchers' paper
- ◆ One member of group presents to plenary
