

**IMIA Operator Algebra Seminar**  
University of Wollongong

Title :  $C^*$ -algebras associated with  $k$ -graphs

Speaker: David Pask (University of Wollongong)

Abstract: I shall describe a  $k$ -graph and its  $C^*$ -algebra. I shall give some examples and describe how we draw them. To avoid technicalities I shall confine myself to the simplest cases. I shall then begin to describe some basic results, confining my first talk to results about group actions.

Time and Date: 3:30pm, Tuesday March 29, 2011

Location: Room 1.G02
