Title: Toeplitz Representations of Topological Graphs

Speaker: Hui Li (University of Wollongong)

Time and Dates: 3:30pm, Thursday, 10 November 2011

Location: Room 15.113 (Access Grid Room)

Abstract: In this talk we will give a new perspective in viewing the usual Toeplitz representations and Katsura's C^* -algebras. This approach avoids use of highly technical Hilbert modules material. Finally we will apply our results to compute a couple of examples.
