Title: Iterated monodromy groups and self-similar actions

Speaker: Mitchell Hawkins (University of Wollongong)

Time and Dates: 4:00pm Thursday, 23 February 2012

Location: Room 15.113 (Access grid room)

Abstract: This work has been a collaboration with Mike and Jacqui. I will introduce the concept of the self-similar action of a group on a rooted tree via iterated monodromy groups with plenty of clear examples.
