Title: Fundamental group of k-graphs

Speaker: Sooran Kang (University of Wollongong)

Time and Dates: 3:30pm Thursday, 8 March 2012

Location: Room 8.G25

Abstract: We first briefly overview the fundamental group of topological spaces and introduce the fundamental group of k-graphs. Then we introduce an algorithm of calculating the fundamental group of k-graphs and give examples. This is a joint work with David Pask.
