

**AMSI National AGR 2013 Seminar Series, hosted by  
School of Mathematics and Applied Statistics  
University of Wollongong**

**Title:** What do K-12 education, the modern battlefield, the movie Memento, and a 64,000 student Stanford MOOC have in common?

**Speaker:** Keith Devlin (Stanford University)

**Time and Date:** Monday 11 February 2013, 3:00pm

**Location:** Room 15.113

**Abstract:** Mathematics provides the answer. In fact, mathematics is the answer. More precisely, mathematical modeling is the answer. More precise still, it's about the process of constructing a mathematical model.
