Title: Noncommutative geometry for k-graph algebras

Speaker: Adam Rennie (University of Wollongong)

Time and Dates: 3:30pm Thursday, 23 May 2013

Location: Room 39C.tearoom

Abstract: Since David and Aidan are away, I feel comfortable discussing k-graph algebras. The picture mirrors the graph algebra case mostly, so I will talk a little more about dimension and summability.

Joint work with David Pask and Aidan Sims
