Title: Amenability via actions of groups

Speaker: Kate Juschenko (Northwestern University, USA)

Time and Date: 3:30pm Thursday, 29 July 2014

Location: Room 39C.meeting room

Abstract: I will discuss a theorem on amenability which unifies many known technical proofs of amenability to the one common proof as well as produces examples of groups for which amenability was an open problem. This is joint with V. Nekrashevych and M. de la Salle.
