

# First Latin American Isi Satellite Meeting On Small Area Estimation

17 NOVEMBER 2015

NIASRA's Professor Raymond Chambers was on the Advisory Board and Program Committee at the First Latin American ISI Satellite Meeting on Small Area Estimation, [SAE 2015](#), held at the Pontifical Catholic University of Chile, 3-5 August 2015. The Small Area Estimation conference aims to assess the current state of development and usage of small area methodology, and to serve as a bridge between statisticians and practitioners working on small area estimation in academia, private and government agencies.

Research student Das Sumonkanti presented a paper titled "Estimation of Small Area Distribution Functions under Heteroskedasticity".

The next Small Area Estimation Conference, [SAE 2016](#), will be held in Maastricht, The Netherlands, August 2016.
