

# Spatio-Temporal Statistics with R

April 29, 2019 @ 8:40 am - April 30, 2019 @ 12:30 pm

This 1.5-day workshop is based on the book by Wikle, Zammit-Mangion and Cressie, *Spatio-Temporal Statistics with R*, published in 2019 by Chapman & Hall/CRC Press and freely available for download from <https://spacetimewithr.org>. The workshop considers a systematic approach to key quantitative techniques for the analysis of spatio-temporal data, with a particular emphasis on hierarchical (empirical and Bayesian) statistical modelling.
