

# SafetyNet FAQs

## When should I report an incident in SafetyNet?

As soon as safe and reasonably practicable after the incident has occurred or the hazard has been identified.

## How do I report an incident in SafetyNet?

See the 'How to report in SafetyNet' poster or video by scanning the QR code.

## Who will see my SafetyNet Report?

Your SafetyNet report will be sent to the WHS unit and your listed Supervisor unless '*confidential*' is selected, in which case, only the WHS Manager will be able to see your report.

In the case that you do NOT select '*confidential*', anyone with a UOW login will be able to read your report via search on SafetyNet.

## What happens if I report an incident in SafetyNet?

WHS and the relevant UOW staff team/s will address the concerns within your report and complete any actions which may be required for the incident/hazard.

## What type of incident should be reported?

Any incident or hazard relating to UOW.

Examples of these include:

- Mould
- Building defects
- General injuries
- Near misses (eg. frayed electrical wire)
- Slips, trips, and falls (eg. into a pond)
