\***Field of Research (FoR)** code classifications are used in the measurement and analysis of research and experimental development (R&D) undertaken in Australia, according to the field of research. In this respect, it is the methodology used in the R&D that is being considered. UOW uses FoR codes to classify research outputs, and has been used to report research data to the Commonwealth Government.

The FoR has three hierarchical levels, namely Divisions (at the broadest subject or discipline level), Groups and Fields (at finer levels). Students submitting their HDR thesis have the option to classify their research using the Group level (4 digit code) or Field level (6 digit code). All Divisions, Groups and Fields are assigned unique codes.
