

Research Network for a Secure Australia

This event is organised by the Research Network for a Secure Australia (RNSA). RNSA is a multi-disciplinary collaboration established to strengthen Australia's research capacity for protecting critical infrastructure (CIP) from natural or human caused disasters including terrorist acts. The RNSA facilitates a knowledge-sharing network for research organisations, government and the private sector to develop research tools and methods to mitigate emerging safety and security issues relating to critical infrastructure. World-leaders with extensive national and international linkages in relevant scientific, engineering and technological research will lead this collaboration. The RNSA also organises various activities to foster research collaboration and nurture young investigators.

Participants are encouraged to join the RNSA. Membership of the RNSA is open to Australian and international researchers, industry, government and others professionally involved in CIP Research. Information on joining is at www.secureaustralia.org.
